## About Me

---

I am a computational biophysicist specializing in bioelectricity of cytoskeletal filaments, nonlinear PDE/ODE modeling, and high-performance scientific computing. My research develops multiscale transmission-line models that link molecular electrostatics with emergent ionic conduction and oscillatory signals in actin and microtubules. I build simulation pipelines in Python, Fortran, and Mathematica, integrating electrokinetics, nanopore transport, and electrodynamics to study cellular information processing.

## Research Interests

---

- Bioelectricity of cytoskeletal filaments (microtubules & actin)
- Electrodynamics and ionic conduction in biological polymers
- Multiscale transmission-line modeling
- Nonlinear PDE/ODE solvers for biophysical systems
- Nanopore-mediated transport and voltage-dependent conductance

## Education

---

Ph.D., Physics — University of Texas at San Antonio (UTSA), 2025

M.S., Physics — University of Texas at San Antonio, 2022

M.S., Physics — University of Chittagong, Bangladesh, 2008

B.Sc. (Hons.), Physics — University of Chittagong, Bangladesh, 2006

## Publications

---

George, A., **Mohsin, M.**, Brancaleon, L., & Marucho, M. Hydrodynamic and Mechanical Properties of Microtubules in Dilute Solutions. Submitted to Macromolecules.

## Selected Presentations

---

### CONFERENCE

**Mohsin, M.**, & Marucho, M. (2024, October 17–19). *Oscillating Electrical Signal Propagation along Microtubules* [Poster session]. The Fall 2024 Joint Meeting of the Texas Section of the APS, Texas Section of the AAPT & Zone 13 of the SPS, Southern Methodist University in Dallas, TX, United States.

**Mohsin, M.**, & Marucho, M. (2024, August 16). *Biophysical Mechanisms Underlying Microtubule Electrical Oscillation and Amplification* [Rapid Fire Talk]. XII Texas Soft Matter Meeting, The University of Texas at San Antonio, San Antonio, TX, United States.

**Mohsin, M.**, & Marucho, M. (2024, May 21–24). “Skin-like” Layer Formation around Cytoskeleton Filaments and their Exceptional Biophysical Properties [Poster session]. 9th annual Biophysical Society of Canada (BSC) Meeting, Université de Montréal in Montréal, Québec, Canada.

## Research Experience

---

### Doctoral Researcher — University of Texas at San Antonio (2021–2025)

- Developed electrodynamic and nonlinear electrokinetic models for ionic signal transport.
- Built multiscale transmission-line solvers (Python/Fortran/Mathematica).
- Modeled nanopore-mediated voltage-dependent conductance.
- Integrated theoretical predictions with experimental observations.

### Graduate Researcher (Master's Thesis) — University of Chittagong (2006–2007)

- Modeled Lorentz and CPT symmetry violations in neutrino oscillations.

## Teaching & Mentoring Experience

---

### Graduate Teaching Assistant, University of Texas at San Antonio (2020–2025)

Undergraduate physics labs: mechanics, electricity, magnetism — strong student evaluations.

### Assistant Professor, University of Chittagong (2012–2020)

Taught Modern Physics, Quantum Mechanics, Statistical Mechanics; supervised M.S. research.

### Adjunct Lecturer, Chittagong Independent University (2013–2017)

Physics for engineering students.

## Honors & Awards

---

- APS Texas Section Travel Grants (2022, 2024)
- UTSA Graduate School Travel Awards (2022, 2024)
- UTSA Writing Scholarship, College of Sciences (2023, 2024)
- Alvarez Scholarship, UTSA (2021)

## Skills & Certifications

---

- Modeling & Computation:** Electrodynamics, nonlinear PDEs/ODEs, transmission-line modeling
- Programming:** Python, Fortran, Mathematica, COMSOL, HPC/parallel computing, Git
- Scientific Software:** Mathematica, COMSOL Multiphysics
- Certifications:** IBM Data Science (2025), PCAP Python (2024), Mathematica (2021)
